

Important guidelines on how to organize your trip to Anguilla during Covid-19 for arrivals starting April 1st, 2022

- *Visitors can only enter Anguilla if they are fully vaccinated (age 18 and older). Accepted COVID-19 vaccinations are Moderna, AstraZeneca, Pfizer, Janssen, Sinopharm, Sinovac, Covaxin. The final vaccine must be administered at least 14 days before your date of arrival.*
- **Arrival after March 31st, 2022: FULLY VACCINATED TRAVELLERS WILL NO LONGER HAVE TO APPLY FOR ENTRY IN ADVANCE. HOWEVER, YOU STILL MUST DO A TEST PRIOR TO YOUR ARRIVAL.** You must do an **rt-PCR-Test 2 to 3 days** prior to arrival or you can do an **Antigen test within 48 hours prior to arrival**. As it will be difficult to get the results back for a PCR Test within 2 days, we strongly recommend doing an Antigen Test 2 days prior to arrival. Usually, they are much cheaper than the rt-PCR test and you should have the results back within hours > see below which tests are accepted!
- **If you travel via St. Maarten (for all travelers):**
*If you are fully vaccinated at least 2 weeks prior to arrival: no test is required to enter St. Maarten but you still must **apply to enter St. Maarten online at <https://stmaartenehas.com/application-form/>**; we recommend applying for your St. Maarten entry 2-3 days prior to arrival (there might be an error message if you start the process too early). **Usually, you get your approval within a few hours, but for sure within 12 hours.** Remember: You must apply again for your travel back home, if you travel via St. Maarten. There are no fees involved in this application. **We recommend printing your St. Maarten approval and take it with you, as you have to present it to the airlines upon check-in you flight to St. Maarten.***
- **Anguilla is accepting the following Covid-19 Tests (ALL TESTS have to be done as nasopharyngeal swab (from the nose):**
ALL THE BELOW TESTS MUST BE DONE BETWEEN 2 TO 3 DAYS PRIOR TO ARRIVAL
 - > Reverse Transcription Polymerase Chain Reaction tests (RT-PCR)
 - > Nucleic Acid Amplification tests (NAA)
 - > RNA or molecular test**ANTIGEN TEST > ONLY VALID IF DONE WITHIN 48 YOURS PRIOR TO ARRIVAL**
 - > Antigen tests completed via a nasopharyngeal (nasal) swab
- **We strongly recommend taking an Antigen Test 2 days prior to arrival as they are less expensive, and the results should be available within hours.**

ALL TEST MUST SHOW THAT THE SAMPLE WAS TAKEN AS A NASAL SWAB

The laboratory that processes your pre-arrival test must be accredited. **Self-administered home tests and antibody tests will NOT BE ACCEPTED.**

- **Once you receive your negative test result, we recommend strongly to send the test to us (Email) so we can verify it is valid for your entry to Anguilla.** We also recommend printing a copy of your test to take with you, as you must present it together with your proof of full vaccination when checking in on either your flight to Anguilla or your boat trip from St. Maarten to Anguilla. Without those two mandatory documents, you will NOT be allowed to board your plane or boat to Anguilla.
- **If you travel via St. Maarten, we will assist you in booking your semi-private charter boat from the Airport in St. Maarten to Anguilla or you can also fly from St. Maarten to Anguilla.** The public ferry from the French side is currently only running 3 times a day and we do not recommend it.
- **On your arrival in Anguilla**
 - a) **If your last vaccine (last dose) is more than 14 days old, but not more than 6 months old, or if you received already a booster shot (even if it is older than 6 month), you will not be tested again upon entry to Anguilla:** You are free to move around the island without any restrictions, can rent a car, go shopping and visit restaurants from the minute you clear immigration and customs. Enjoy your stay!
 - b) **If your last vaccine (last dose) is more than 6 months old and you did not receive a booster, you will be tested on arrival.** There will be a US\$50.00 fee for the entry test payable at the port of entry. You will have to take a certified taxi to Carimar Beach Club and stay on property until you receive the arrival test result for your party. Usually, it takes a couple of hours to receive your result. Make sure you also check your Junk Mail as well when waiting for the result. You can take a swim, but you need to always keep a social distance (6 feet). After you received your negative test result, you are free to explore the island, rent a car and enjoy Anguilla as always.
 - c) **Unvaccinated visitors under 18 years old** are only permitted to enter Anguilla if they are accompanied by fully vaccinated travelers). They will be tested on arrival (US\$ 50.00 fee), same procedure as listed under b).
- **When you leave the Island:** Anguilla itself does not require a test when you depart. However, most countries, including the US, are requiring a test (sometimes an Antigen Test is sufficient) to enter their country. We can arrange the test for you a few days prior to departure. Cost of those tests are between US\$ 60.00 to US\$ 100.00 (Antigen test) and US\$ 100.00 to US\$ 150.00 (PCR-Test). **Starting December 6th, the United States is requiring a Covid test one day prior to arrival in the US. Anguilla can provide the test in time, and you will receive the result before your departure.** We recommend strongly to reserve your test as early as possible in advance (after your arrival). Please contact us and we will assist you in arranging the test you need to travel back to your home. We can also arrange to have the test done at Carimar Beach Club, however, there will be a surcharge between \$15.00 and \$50.00 per person (pending on the day and who will do the test). Testing pricing subject to change.

- ***If you leave the Island via St Maarten:*** You will need to apply again like you have done when arriving (see details of protocols above). You can do the application again 2-3 days prior to arrival in St. Maarten and upload your vaccination paper. You receive your approval usually within a few hours, but not more than 12 hours. We recommend choosing air as form of transportation to St. Maarten (although you might take a boat) and then put your semi-private charter boat name as carrier.
